

**IN THE CLAIMS:**

Please make the following changes to the claims.

1. (Currently Amended) A weather stripping for use in sealing an interface between selected portions of a vehicle, comprising:

a body portion that is adapted to be supported on a selected one of the vehicle portions;

and

a sealing portion extending at least partially away from the body portion, the sealing portion and the body portion comprising ~~at the same~~ thermoplastic material with ~~at least~~ the sealing portion having a microcellular structure .

2. (Currently Amended) The weather stripping of claim 1, wherein the thermoplastic material comprises ~~TPV~~thermoplastic vulcanize.

3. (Original) The weather stripping of claim 2, wherein at least the thermoplastic material of the sealing portion is foamed.

4. (Original) The weather stripping of claim 1, wherein the microcellular structure includes cells having a size less than about 2 microns.

5. (Original) The weather stripping of claim 4, wherein the microcellular structure includes cells having a size between about .1 micron and about 1.0 micron.

6. (Original) The weather stripping of claim 1, wherein the thermoplastic material has a microcellular structure with a cell density in the range from about  $10^9$  to about  $10^{15}$  per cubic centimeter.

7. (Original) The weather stripping of claim 1, wherein at least one of the body portion or the sealing portion has a cross sectional dimension that selectively varies along a length of the weather stripping.

8-14. (Cancelled).

15. (Currently Amended) A weather stripping for use in sealing an interface between selected portions of a vehicle, the weather stripping having a body portion that is adapted to be supported on a selected one of the vehicle portions and a sealing portion extending at least partially away from the body portion, made by the process comprising the steps of:

melting a thermoplastic material;

introducing a supercritical fluid into the melted thermoplastic material;

forming a microcellular structure in the thermoplastic material using the supercritical fluid; and

forming the entire weather stripping from the thermoplastic material having the microcellular structure.

16. (Currently Amended) The weather stripping of claim 15, wherein the thermoplastic material comprises TPV thermoplastic vulcanizate.

17. (Original) The weather stripping of claim 15, wherein the microcellular structure includes cells having a size less than about 2 microns.

18. (Original) The weather stripping of claim 17, wherein the microcellular structure includes cells having a size between about .1 micron and about 1.0 micron.

19. (Original) The weather stripping of claim 15, wherein the thermoplastic material has a cell density in the range from about  $10^9$  to about  $10^{15}$  per cubic centimeter.

20. (Original) The weather stripping of claim 15, wherein at least one of the body portion or the sealing portion has a cross sectional dimension that selectively varies along a length of the weather stripping.

**RESPONSE TO RESTRICTION REQUIREMENT**

Applicant hereby confirms the election of claims 1-7 and 15-20. Claims 8-14, which have been withdrawn from consideration are cancelled above.
